

SAVNATURAL SERIES

Crafted from
**PLANT BASED &
NATURAL INGREDIENTS**

SAVNATURAL SERIES

Over the years; Savita Group have pioneered a range of Petroleum Jellies meeting specific customer applications. With an increasing requirement on sustainability and bio-based products – we have launched our range of Natural Jellies – SavNatural series.

Jellies are homogeneous mixture of oil and waxes – in this case all our ingredients are derived from natural and plant based sources. Our products provide a smooth structure that is stable under specified conditions. It heals dryness and protects the skin from windburn and chapping. They can be used for body applications like creams, lotions and balms.

Since all the ingredients are natural or 100% naturally derived – they retain their original benefits like anti-oxidant and anti-bacterial properties. With our know-how we can provide tailor made products as per customer requirements.

Typical properties of our range are as under:

DATA	VALUE
Drop Melting Point (Deg C)	75
Congeaing Point (Deg C)	52
Penetration at 25 (Deg C)	110 to 175
Viscosity at 100 Deg C (cst)	(Depending on Grade) 8 to 10
Color (D1500)	0.5
